WORK EXPERIENCE

// SkyeVaultDB · Open Source

Founder & Lead Engineer

★ Founder

Mar 2026 – Present

Architecting **SkyeVaultDB** — an open-source distributed document database written from scratch in **C++17**. A long-term solo systems engineering project focused on deep internals: storage engines, query parsing, replication, and fault tolerance — built to production-quality standards with no shortcuts.

FLAGSHIP PROJECT

● SkyeVaultDB

A fully custom distributed document database engine built in C++17. Implements its own storage layout, document serialization, query interface, and plans for sharding & replication. Designed as a long-haul engineering study in how real databases work at the lowest level.
